

Chairman Powell, Certainly you have "larger fish to fry" than to worry about the NAB's worries over XM Satellite's transmission of weather and traffic. It is simply a choice we make to listen to and rely on competent reporting versus the local idiots on local radio stations. Leave XM to its own devices.

Rather, spend your time on delivery of cable television which is so unfair relative to dictated programming which drives up MY COSTS!!

Furthermore, there is way too much indecency on the broadcast waves so I would think this much higher a priority for you than this silly XM issue.

Cordially,
Kathy Maio
